EDUCATION

VASIREDDY VENKATADRI INSTITUTE OF TECHNOLOGY

Guntur, India

Bachelor of Technology

2020 - 2024

- **Course:** Computer Science and Engineering (AI&ML)
- **Cumulative GPA:** 8.88
- **Relevant Coursework:** Full stack Web Development - ReactJS, Django, MongoDB, MYSQL, Python, Java, JavaScript, Artificial Intelligence, Machine Learning, Natural Language Processing, Cloud Computing, AWS Cloud & DevOps.

VIGNAN JUNIOR COLLEGE

Vadlamudi, India

Intermediate

2018 - 2020

- **Course:** MPC
- **Percentage:** 98%

PROFESSIONAL EXPERIENCE:

Tata Consultancy services, GenAI Engineer

Aug 2025 - Present

- Designed and built autonomous AI agents and RAG pipelines using LangChain and LangGraph to automate complex workflows, including lead generation and technical processes.
- Developed scalable backend systems with FastAPI and Streamlit, integrating CRM tools like Salesforce and vector databases like ChromaDB for real-time AI-driven workflows.

Persist Ventures, Lead AI Developer

Feb 2024 – Aug 2025

- **AI Alerts (Client Project):** Built a full-stack app using Next.js and FastAPI with a virtual AI avatar for categorized news delivery (Crypto, Web3, AI). Implemented real-time web scraping and used generative AI to convert data into teleprompter scripts, improving content generation speed by 40% and enhancing delivery accuracy.
- **Startupathon** — Developed an internal hiring funnel system to automate job postings and track candidate performance, reducing hiring time by 60% and improving evaluation through project-based tracking.
- **Swissmote** — Engineered an end-to-end SaaS hiring platform, reducing time-to-hire by 85%. Integrated an AI-powered ATS for resume screening, an automated AI interviewer for skill evaluation, and an assignment evaluation system. Included features like RBAC, job automation, interview scheduling, and onboarding workflows.

Virtues R&D Pvt Ltd, SDE

Feb - Apr 2024

- Built a full-stack application with a FastAPI Python backend and Next.js (Node.js), enabling role-based user interaction.
- Fine-tuned GPT models to create an algorithm to parse larger documents and extract required information and create a Standard Operating Procedure (SOP), for performing specific tasks or processes within an organization.

Solomons International Technologies, NLP Engineer

Aug 2023 - Feb 2024

- Fine-tuned BERT and GPT models for text summarization and generation in contract approval documents, achieving an 80% improvement in retrieval accuracy over the previous YOLO model-based detection.
- Optimized the Spring Boot backend, resolved existing bugs, and restructured the SQL database for faster querying. Revamped the website in React.js with a modular approach, enhancing user interaction by 50%.

Persist Ventures, AI Developer

Jun - Aug 2023

- Developed a deep neural network model to convert a 2D NFT image to an 3D (.obj) model.
- Built Generative Adversarial Network (GAN) approach resulting 73% accuracy in full-body generation of NFT images and PiFu model with 80% accuracy in 3D body reconstruction.

Inspire Race, SDE

May 2022 - Jun 2023

- Developed a personalized web app with user data (baby's age, gender) to deliver custom suggestions, resulting in a 30% increase in engagement for new mothers.
- Utilized Machine Learning (similarity search) and NLP (LLM & embedding models) for reducing the GPT cost by about 10%.

PROJECTS

Satellite maps to Aerial maps

- Satellite-to-Aerial map converter works using U-Net segmentation with IoU score of 0.62 with a dice loss of 0.19 and Pix2Pix image translation.
- The overall accuracy of the model in generating of street views is 83%.

OTT Platform – Inspired by Netflix

- Developed a full-stack web application in Next.js and Node.js, integrating Firebase for database management and secure authentication. Enabled personalized user profiles with robust data handling capabilities.
- Implemented a collaborative filtering recommendation engine to deliver accurate, scalable, and real-time personalized suggestions.

Automated Notes Maker from Audio/Video Recordings

- An application that converts recorded classes into topic-segmented notes with features such as live transcription, translation, summarization with gemini, and text-to-speech using multilingual tts models.
- Integrated functionalities like querying document using similarity search, subtitle generation based on timestamps, and image-based question answering using Gemini vision models, providing comprehensive and interactive educational support.

DocLocker – Virtual Locker

- A telegram bot using Python to automate the process of storing and retrieving documents from anywhere with secure authentication as you can clear the history once you retrieved your docs.
- Integrated MongoDB to efficiently store and manage files, ensuring seamless access and retrieval through the telegram bot.

SKILLS

Technical skills:

- **Data Science:** Machine Learning, Deep Learning, Natural Language Processing.
- **Programming Languages:** Python, Java.
- **Web Development:** React, NextJs, FastAPI , Django, HTML, CSS, JavaScript, Node.
- **Databases:** MySQL, MongoDB, DBMS.
- **Version Control:** Git and GitHub.
- **Cloud Computing:** Amazon Web Services (AWS), Microsoft Azura.
- Data Structures & Algorithms.

Soft Skills:

- Curiosity and Willingness to Learn, Analytical, Leadership, Collaboration.

ACHIEVEMENTS

- Scored 95% in JEE mains.
- District level volleyball player.
- Winner of the AI Hackathon conducted by TCS (Tata Consultancy Services).

CERTIFICATIONS

- AI For Everyone (DeepLearning.AI)
- Machine Learning Foundations (AWS Academy)
- Artificial Intelligence & Machine Learning (AICTE)
- Deep Learning with PyTorch (Infosys Springboard)
- Designing a Low Fidelity Prototype in Figma (Coursera Project Network)
- Front-End Web Development with React (University of HONG KONG)
- Data Analytics (AICTE)
- Cloud Architect (AWS Academy)
- Cloud & DevOps (EPAM Center of Excellence)

HOBBIES

- Watching anime/movies, making animations, video editing, playing volleyball.
